The dataset captures ■10.62 Crore in total revenue with 27,981 orders placed by 3,752 unique customers.

■10.6 Cr	27,981	■3,797	70.0%
Total Revenue	Total Orders	Avg Order Value	Female Revenue Share

Key Findings at a Glance:

- The 26–35 age group dominates revenue — the most commercially active demographic during Diwali.
- Female customers drive 70.0% of total revenue, outspending male counterparts.
- Uttar Pradesh leads all states in total sales, followed closely by other western and northern states.
- The Central zone is the highest-grossing region.
- Food is the best-selling product category by revenue.
- IT Sector and Healthcare professionals are top spenders by occupation.
- Married customers account for the majority of purchases, particularly married women.

■ Gender Analysis

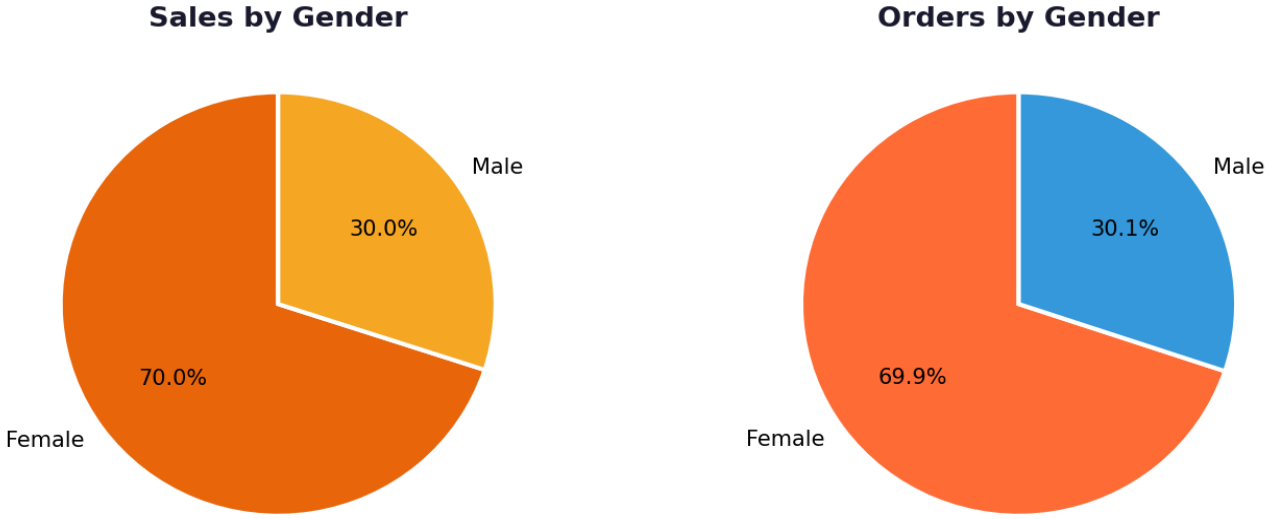

Figure 1: Revenue & Order Distribution by Gender

■74.3M	■31.9M	19,548	8,433
Female Revenue	Male Revenue	Female Orders	Male Orders

- Female buyers generate 70.0% of total revenue — significantly higher than male buyers.
- Women place more orders per transaction on average, suggesting stronger purchase frequency.
- Marketing campaigns should prioritize female-centric channels (Instagram, WhatsApp, lifestyle platforms).
- Male buyers show higher average order values, suggesting preference for premium/bulk purchases.

■ Age Group Analysis

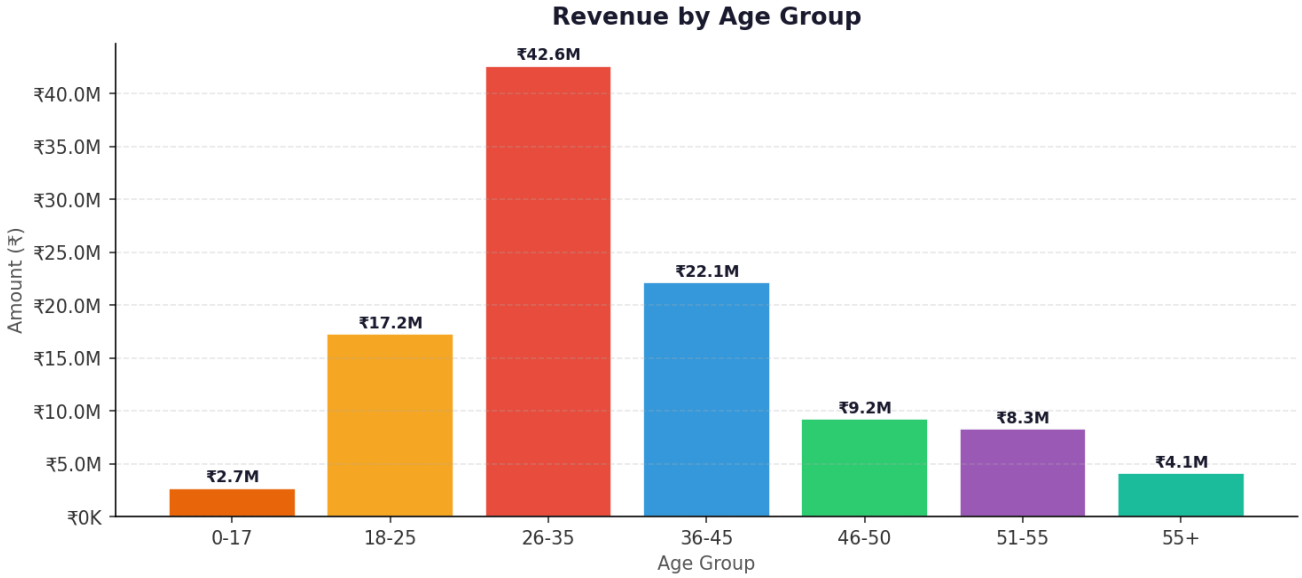

Figure 2: Total Revenue by Age Group

- The 26–35 age group is the #1 revenue driver with ■42.6M — young professionals with disposable income.
- The 36–45 group ranks second (■22.1M), representing established households with high spending capacity.
- Teens and young adults (0–17, 18–25) contribute the least — lower purchasing power but a future growth segment.
- The 51–55 and 55+ groups show moderate spending, likely gifting-focused purchases during Diwali.
- Recommendation: Target 26–45 age band with premium product bundles and EMI offers.

■■ State & Regional Analysis

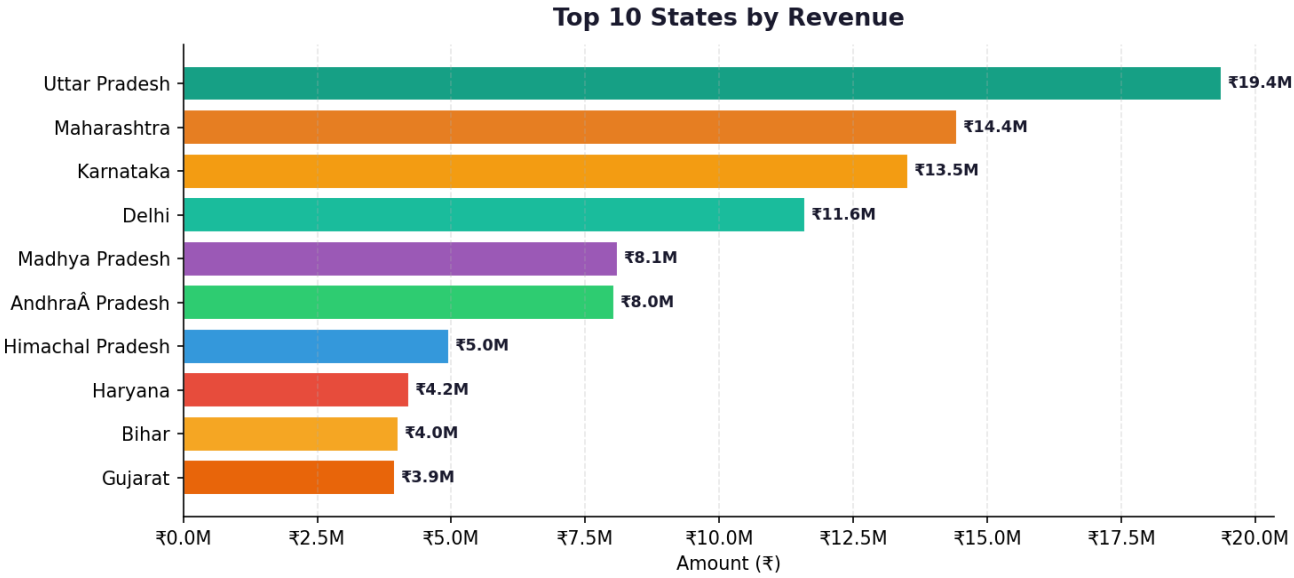

Figure 3: Top 10 States by Revenue

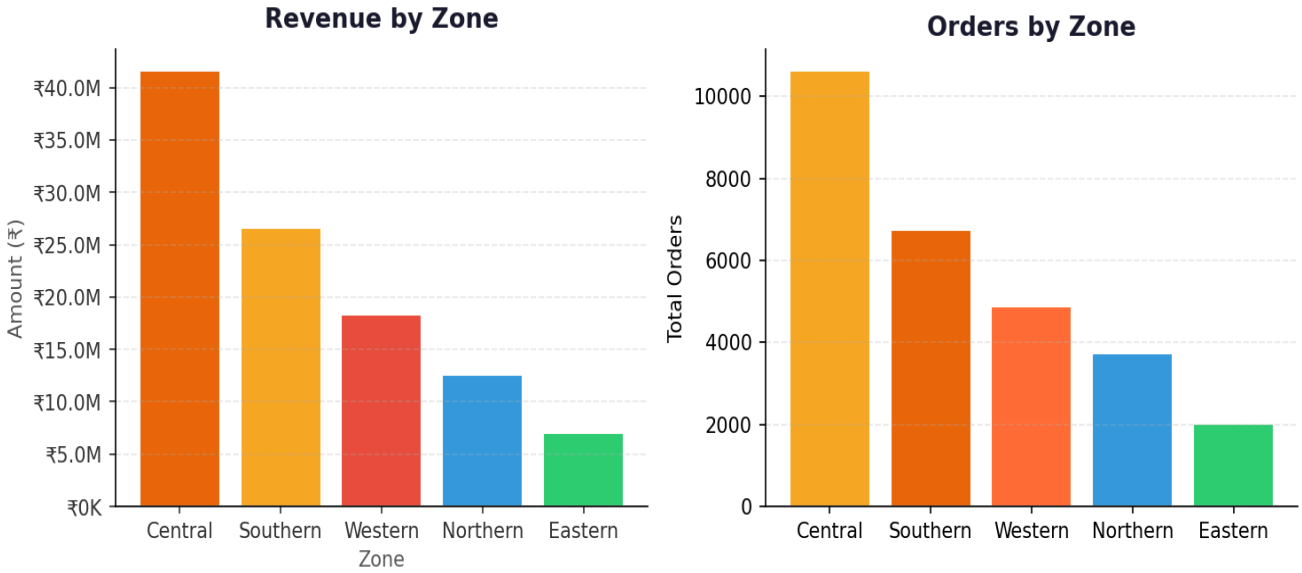

Figure 4: Revenue & Orders by Zone

- Uttar Pradesh tops revenue at ■19.4M, likely due to urban concentration and high population.
- Maharashtra (■14.4M) and Karnataka (■13.5M) round out the top 3.
- The Central zone leads regionally — reflecting strong consumer markets.
- Eastern and Northern zones show lower sales — opportunity for regional expansion and localized campaigns.
- Recommendation: Concentrate inventory and delivery logistics in Maharashtra, UP, and Karnataka.

■ Occupation Analysis

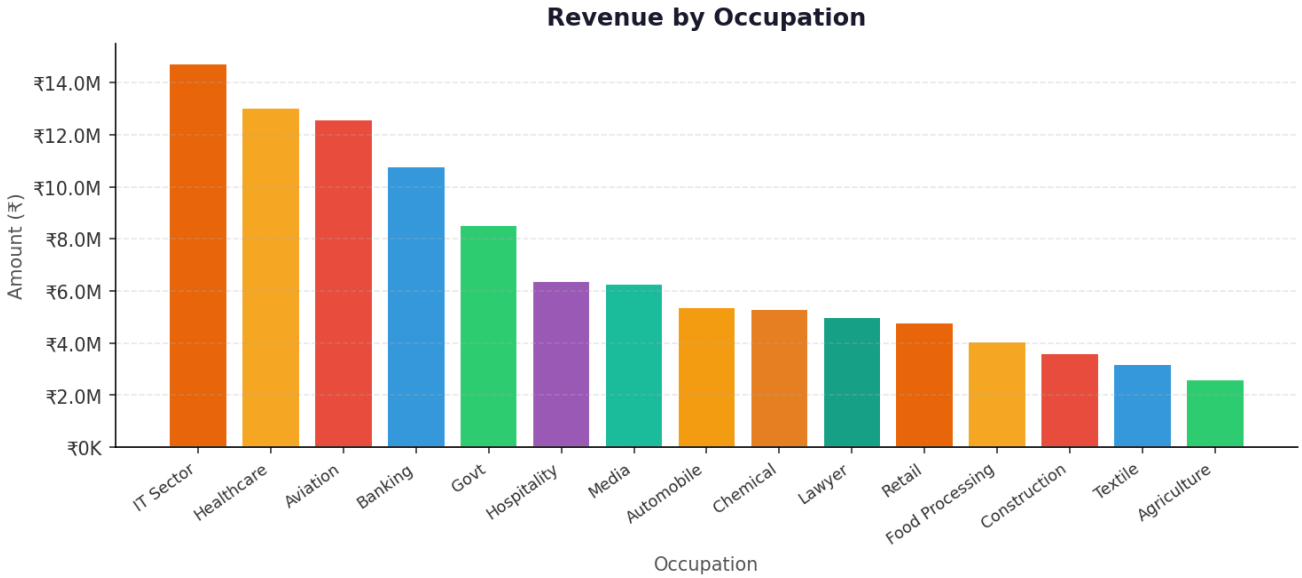

Figure 5: Revenue by Occupation

• IT Sector professionals are the top spenders — high salaries and tech-savvy shopping habits drive this.

• Healthcare workers rank highly, reflecting essential workers with stable incomes and festive bonus spending.

• Aviation and Banking professionals also show strong spending patterns.

• Agriculture and Textile sector workers spend the least — price-sensitive segment, ideal for value offers.

• Recommendation: Partner with corporate gifting programs for IT, Healthcare, and Banking sectors.

Rank	Occupation	Revenue
1	IT Sector	■14.76M
2	Healthcare	■13.03M
3	Aviation	■12.60M
4	Banking	■10.77M
5	Govt	■8.52M

■ Product Category Analysis

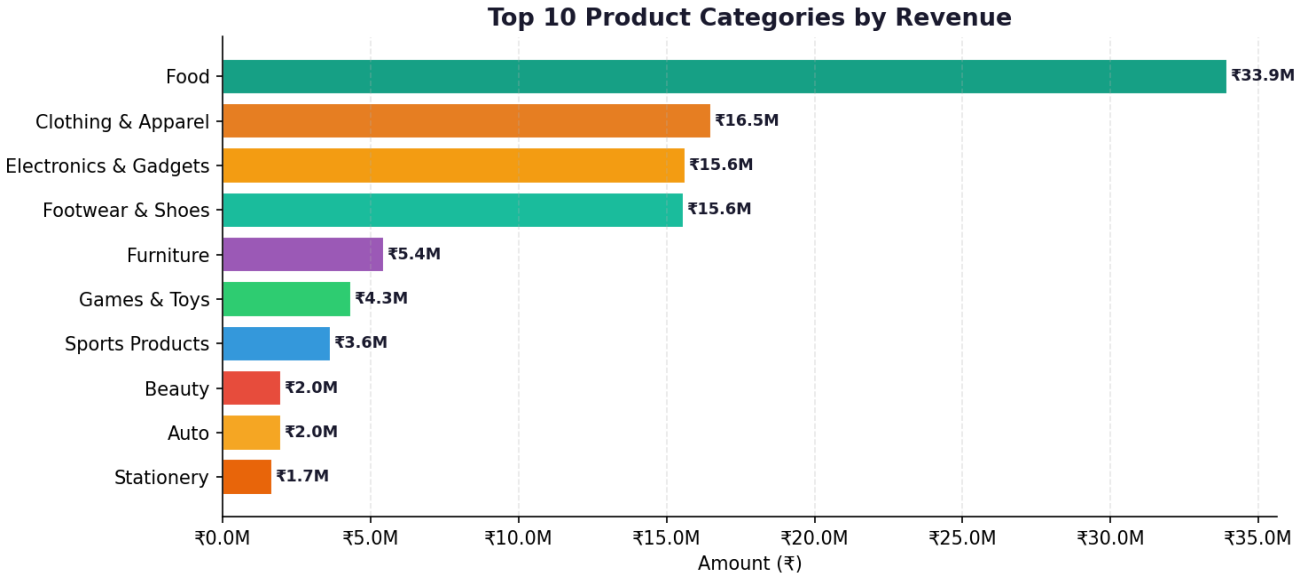

Figure 6: Top 10 Product Categories by Revenue

- Food is the best-selling category (■33.9M) — high-value purchases align with festive gifting.
- Clothing & Apparel (■16.5M) and Electronics & Gadgets (■15.6M) complete the top 3.
- Food & Clothing are volume drivers — frequent, repeat purchases with lower average ticket size.
- Pet Care and Veterinary categories rank lowest — niche market with growth potential.
- Recommendation: Feature top 3 categories prominently in Diwali landing pages and push notifications.

■ Marital Status Analysis

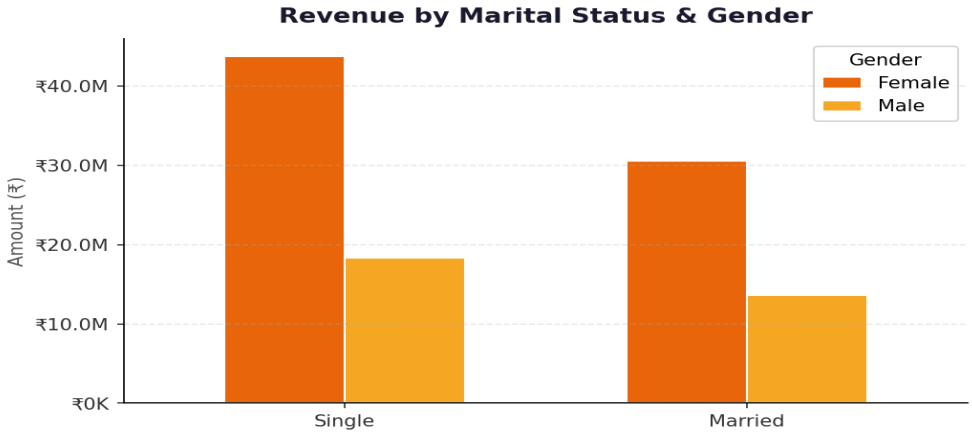

Figure 7: Revenue by Marital Status & Gender

• Married customers account for ■44.1M vs ■62.1M for single customers.

• Married women are the highest-spending segment — likely purchasing for household, family gifting, and celebrations.

• Single customers, while lower in spend, are tech-savvy and respond better to digital/social media campaigns.

• Recommendation: Festival family bundles and 'gift for someone special' campaigns can capture married segment effectively.

■ Strategic Recommendations

#1 Target Segment	Married women aged 26–35 in IT/Healthcare in Western India — highest ROI segment.
#2 Geography Focus	Double down on Uttar Pradesh, Maharashtra, Karnataka — these 3 states alone drive majority of
#3 Product Priority	Lead with Food, Clothing & Apparel, and Electronics & Gadgets in hero placements.
#4 Channel Strategy	Instagram & WhatsApp for female 26–35 demo; LinkedIn for IT/Banking professionals.
#5 Loyalty Programs	Build repeat-purchase incentives for 36–45 age group — second highest spenders.
#6 Regional Expansion	Run growth campaigns in Eastern zone — currently under-penetrated relative to population.

■ Happy Diwali — May your data shine as bright as the festival of lights!
